Valdemar Gerzain Magaña Nicolás

Sofware Enginner and FrontEnd Developer

I am graduate from University of Colima, with a bachelor degree on software enginering. I have knowledge on programing, software development projects and agile metodologies. I like FrontEnd development and the use of those technologies. I really like to layout, design user interfaces and all that creative proces. I like work in team a lot, without any dude is the best way to reach goals, also is a simple but effective way to share information and knowledge.
